COURSE SLIDES · NON-WSQ

Canva Design Masterclass

Course code C156

Duration 1 day · 7.5 instructional hours

Provider Tertiary Infotech Academy Pte Ltd · UEN: 201200696W

Version v1.0 · 30 September 2026

GENERAL TRAINER PROFILE

Trainer Profile Template

Name

Trainer:

_____

Industry practice

Relevant visual communication, design-production or creative-technology experience.

Adult learning

Approved adult-training credentials for this delivery context.

Facilitation

Concept explanation, demonstration, coached practice and evidence review.

Quality focus

Clear hierarchy, visible rationale, verified output and responsible asset use.

Contact route

Use the provider-approved learner support channel.

NAMED TRAINER PROFILE

Dr Alfred Ang

Role

Principal Trainer · Tertiary Infotech Academy Pte Ltd

Expertise

Digital transformation, creative technology, courseware development and adult learning.

Facilitation

Concept-first explanation followed by coached practice and evidence review.

Quality focus

Source alignment, reproducible workflows and clear acceptance criteria.

Learning culture

Ask early and explain the reason behind each design choice.

Contact

enquiry@tertiaryinfotech.com · +65 6100 0613

OPENING DISCUSSION

Your Visual-Communication Context

Role

What visual messages do you create or manage?

Channel

Screen, social, presentation, workplace or print?

Friction

Which Canva or design task currently costs the most time?

Quality

Which communication defect is most visible in current output?

Experience

Which Canva feature or design principle is already familiar?

Evidence

What finished artifact will prove improvement?

GROUND RULES

Working Agreements

Participate

Try the tools and explain choices.

Respect

Critique the work, not the person.

Protect assets

Use permitted sources and retain rights evidence.

Save versions

Preserve baselines and name pages, versions and exports.

Share safely

Protect learner work and course content.

Verify

Reopen exports before delivery.

LMS-TMS VISUAL ROUTE

Download Course Materials

1. Open LMS-TMS
2. Select this course
3. Open Courseware
4. Download package
5. Check 10 labs

OUTCOME

Portal: https://lms-tms.tertiaryinfotech.com/ · Confirm the deck, Learner Guide, Lesson Plan and ten image-based lab folders before starting.

COURSE FLOW

One-Day Learning Journey

1 **Explore**

2 **Compose**

3 **Sequence**

4 **Evaluate**

5 **Enhance**

OUTCOME

The morning builds visual language and story flow; the afternoon evaluates, collaborates and delivers a coherent campaign system.

SIX CONNECTED TOPICS

Course Outline

Topic 1

Introduction to Canva and Basic Design Principles
Interface model · visual brief · hierarchy · typography · layout · media integration
LO1

Topic 2

Colour and Form in Canva Design
Colour relationships · meaning · contrast · shapes · image treatment · context
LO1

Topic 3

Storyboarding and Flow Design in Canva
Narrative beats · sequence · task flow · annotation · transitions · shared intent
LO2

Topic 4

Best Practices and Aesthetic Analysis in Canva
Design principles · usability · rubric-based review · diagnosis · evidence-led recommendations
LO2

Topic 5

Critical Review and Enhancement Strategies
Critique protocol · collaboration · version comparison · prioritisation · iteration
LO3

Topic 6

Innovative Approaches to Design in Canva
Brand systems · reusable templates · collaboration · multi-format adaptation · responsible AI
LO3

DESIGN ENVIRONMENT

Tools, Materials and Workspace

Hardware

Laptop, suitable display, pointing device and reliable storage.

Software

A current supported Canva browser or desktop experience.

Workspace

Projects, folders, pages, editor panels, layers, position and comments.

Sources

Rights-cleared PNG/JPEG imagery, logos and visual references.

Output brief

Audience, dimensions, hierarchy, safe area and JPEG quality.

Safety

Named baselines, controlled revisions and verified exports.

TOOL CONTEXT

Canva Scope and Disclaimer

Industry use

Campaign graphics, presentations, storyboards, task flows and collaborative review.

Skills course

This course develops practical visual-communication skills rather than an external Canva certification.

Interface drift

Labels and plan availability may change; design principles remain stable.

Decision over clicks

Choose by message, audience, hierarchy, context and evidence.

Responsible AI

Review generated material and retain provenance where relevant.

Trademark

Canva is a trademark of Canva Pty Ltd; the provider is not affiliated with Canva.

01

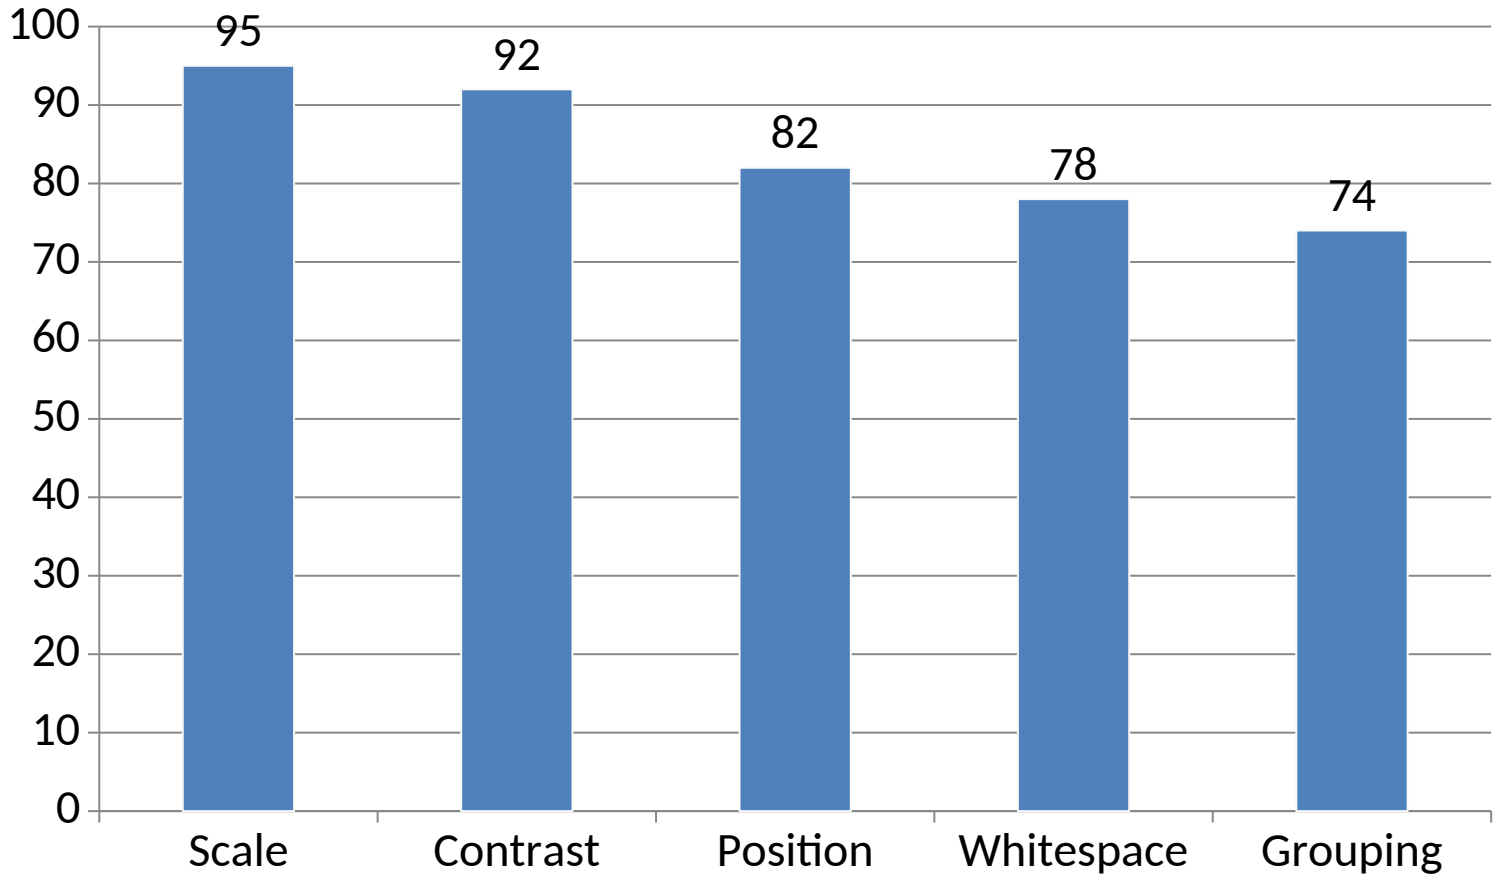

Introduction to Canva and Basic Design Principles

Interface model · visual brief · hierarchy · typography · layout · media integration

LO1

EDITABLE CONCEPT CHART

Hierarchy Strength by Visual Cue

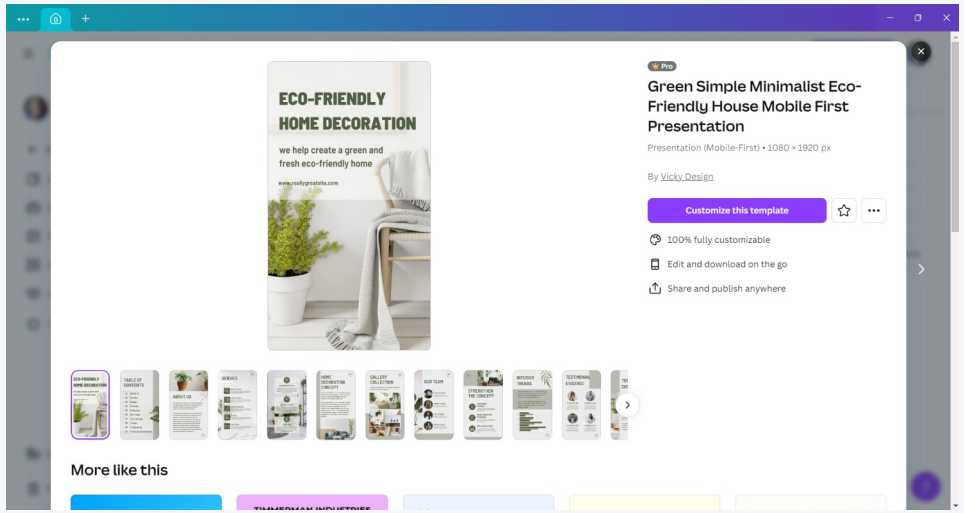

READ THE CHART

Combine cues deliberately instead of making every element equally prominent.

Editable native PowerPoint chart

Communication Brief

1

How it works

Purpose, audience, message, channel and response define the design problem.

2

Best used for

Preventing template-led design from drifting away from the communication need.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

A one-page brief states what the audience must notice, understand and do.

Communication Brief · control and judgement

CONTROL MAP

Audience; single message; call-to-action; format; constraints; success measure.

WATCH FOR

Starting with a preferred style before the message is clear.

QUALITY PROOF

A one-page brief states what the audience must notice, understand and do.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Canva Workspace Model

1

How it works

Projects contain designs; pages contain compositions; the editor brings together templates, elements, text, uploads and apps.

2

Best used for

Navigating Canva without losing track of source assets and versions.

3

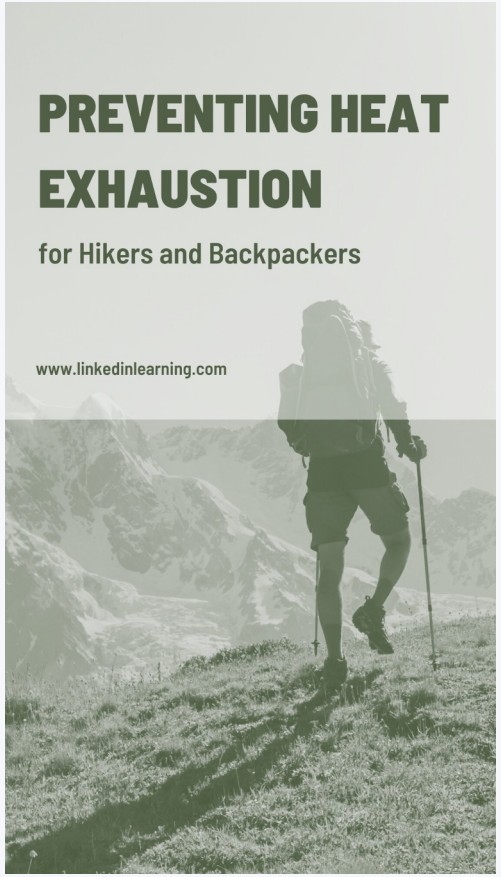

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The learner can locate, name, duplicate, share and export the intended design.

Canva Workspace Model · control and judgement

CONTROL MAP

Projects; folders; page names; editor panels; zoom; position; layers; comments.

WATCH FOR

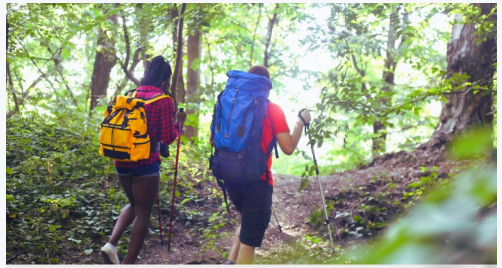

Interface labels and feature availability may differ by plan and release.

QUALITY PROOF

The learner can locate, name, duplicate, share and export the intended design.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Visual Hierarchy

INTRODUCTION

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Maecenas quis efficitur orci. Donec lacus elit, interdum et posuere in, blandit ac sem. Sed facilisis, urna sit amet pretium lacinia

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Maecenas quis efficitur orci. Donec lacus elit, interdum et posuere in, blandit ac sem. Sed facilisis, urna sit amet pretium lacinia, ipsum leo facilisis augue, non commodo urna orci sed risus. Nulla facilisi. Nunc volutpat metus eget egestas condimentum. Pellentesque convallis tincidunt faucibus. Vestibulum vel tincidunt elit. Nulla vel lorem nec enim volutpat luctus. Proin aliquet libero dui, placerat bibendum velit mollis in.

03

1

How it works

Scale, contrast, position, whitespace and grouping create a reading order.

2

Best used for

Posters, presentations, social graphics and information designs.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

A five-second viewing test returns the intended first, second and third messages.

Visual Hierarchy · control and judgement

CONTROL MAP

Primary message; secondary support; body detail; call-to-action; focal point.

WATCH FOR

Making every element equally large, bright or bold.

QUALITY PROOF

A five-second viewing test returns the intended first, second and third messages.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Typography System

1

How it works

Display, heading and body roles create consistent hierarchy through type choice and spacing.

2

Best used for

Professional layouts that must remain readable and on-brand.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Text remains legible at delivery size and every type style has a defined role.

Typography System · control and judgement

CONTROL MAP

Typeface role; size; weight; leading; tracking; line length; alignment.

WATCH FOR

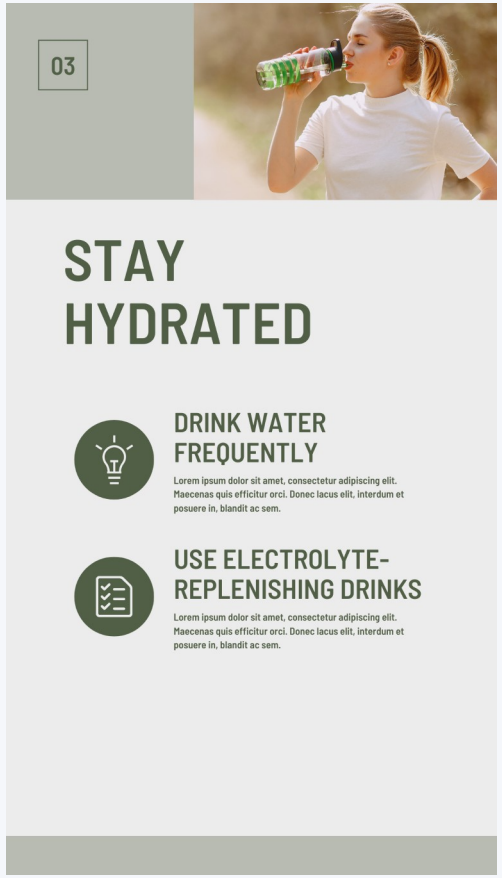

Too many fonts, poor contrast, decorative body type and unlicensed faces.

QUALITY PROOF

Text remains legible at delivery size and every type style has a defined role.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Grid, Alignment and Negative Space

1

How it works

Invisible columns and shared edges create order while negative space separates and emphasises.

2

Best used for

Layouts with multiple images, text blocks and calls-to-action.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Key elements share a visible alignment logic and the focal content has space.

Grid, Alignment and Negative Space · control and judgement

CONTROL MAP

Margins; columns; gutters; baselines; proximity; balance; breathing room.

WATCH FOR

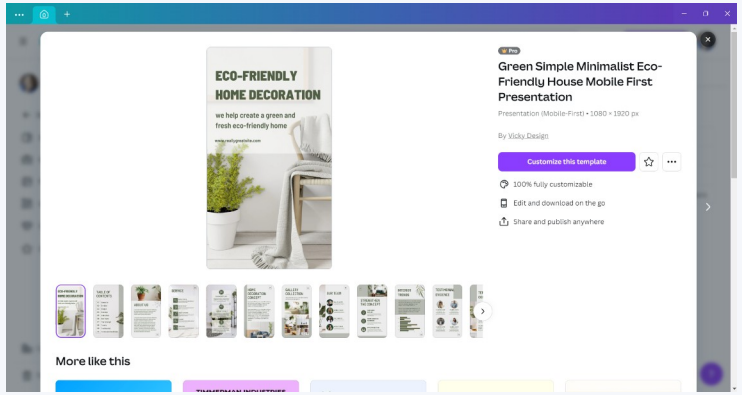

Filling every gap or aligning each item to a different edge.

QUALITY PROOF

Key elements share a visible alignment logic and the focal content has space.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Lab 01 · Visual Brief and Layout Exploration

Create a workplace heat-exhaustion awareness visual that can be understood quickly by staff.

Translate a communication need into a visual brief and two layout directions.

1. **Brief**
2. **Compose**
3. **Compare**
4. **Review**
5. **Evidence**

EVIDENCE — **Brief, two layout variants, five-second test note and final JPEG.**

Full procedure · Learner Guide / Lab 01

Lab 02 · Typography Hierarchy and Message Control

Refine the heat-exhaustion communication so headline, symptoms and action read in the correct order.

Create a readable three-level type system and apply it to an awareness visual.

1. **Brief**
2. **Compose**
3. **Compare**
4. **Review**
5. **Evidence**

EVIDENCE — **Final JPEG plus a type-style reference showing font roles and settings.**

Full procedure · Learner Guide / Lab 02

EXPLAIN THE DESIGN DECISION

Topic 1 Checkpoint

Purpose

What must the audience notice or understand?

Method

Why does this visual method fit the brief?

Control

Which setting most changes the result?

Failure

What defect would make it unacceptable?

Proof

Which view, comparison and export demonstrate quality?

Next

What controlled variation would improve it?

02

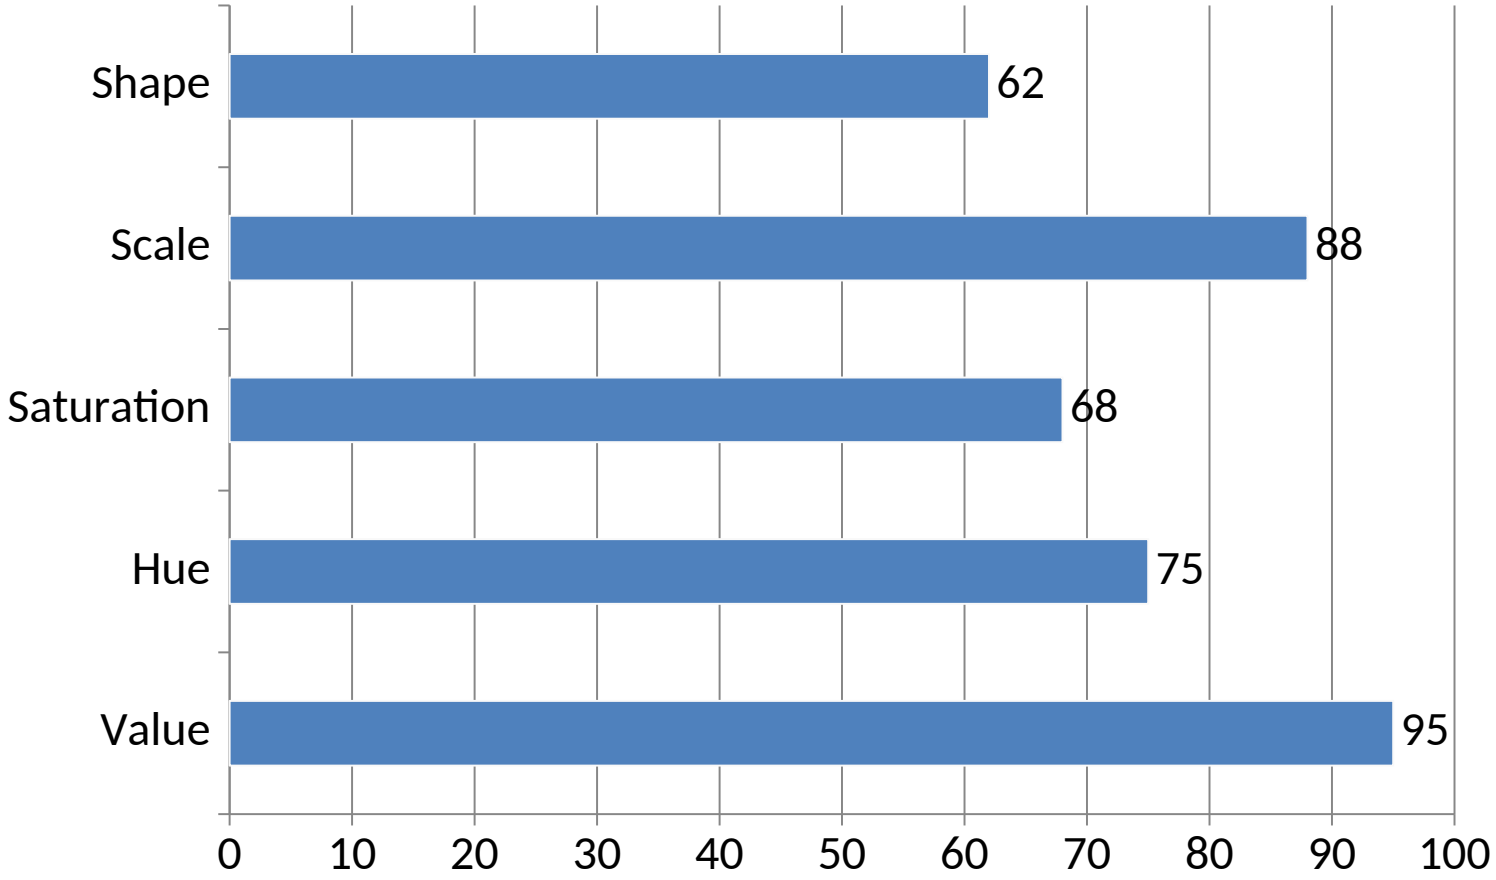

Colour and Form in Canva Design

Colour relationships · meaning · contrast · shapes · image treatment · context

LO1

EDITABLE DECISION CHART

Contrast Levers

READ THE CHART

Value and scale often remain reliable when colour perception or viewing conditions vary.

Editable native PowerPoint chart

Colour Wheel Relationships

1

How it works

Hue relationships organise harmony and contrast through analogous, complementary, split-complementary and triadic schemes.

2

Best used for

Choosing a controlled palette for a mood board or campaign.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

A 3–5 colour palette assigns a purpose to every swatch.

Colour Wheel Relationships · control and judgement

CONTROL MAP

Dominant hue; supporting hues; accent; saturation; value; neutral.

WATCH FOR

Using equal amounts of every palette colour.

QUALITY PROOF

A 3–5 colour palette assigns a purpose to every swatch.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Colour Meaning and Context

1

How it works

Colour carries learned associations that change across culture, sector and situation.

2

Best used for

Brand personality, safety communication and emotional framing.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The rationale explains the intended association and how it was checked.

Colour Meaning and Context · control and judgement

CONTROL MAP

Audience; cultural context; sector conventions; emotional objective; testing.

WATCH FOR

Treating colour psychology as universal or deterministic.

QUALITY PROOF

The rationale explains the intended association and how it was checked.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Contrast and Accessibility

1

How it works

Value, hue, saturation and size differences separate content and support legibility.

2

Best used for

Text over images, small screens, presentations and public information.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Critical text remains readable in grayscale, at actual size and over the selected image.

Contrast and Accessibility · control and judgement

CONTROL MAP

Foreground/background value; overlay; type size; viewing distance; device.

WATCH FOR

Relying on colour alone to encode meaning.

QUALITY PROOF

Critical text remains readable in grayscale, at actual size and over the selected image.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Shape Language

1 How it works

Geometric and organic forms suggest different qualities and create containers, paths and visual rhythm.

2 Best used for

Brand graphics, diagrams, labels and editorial accents.

3 Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4 Quality signal

Every dominant shape supports message, grouping or movement.

Shape Language · control and judgement

CONTROL MAP

Corners; curvature; repetition; overlap; outline; scale; direction.

WATCH FOR

Decorative shapes that obscure rather than organise information.

QUALITY PROOF

Every dominant shape supports message, grouping or movement.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Image Integration

1

How it works

Cropping, framing, scale, overlays and colour treatment make photography behave as part of the system.

2

Best used for

Campaigns mixing product, lifestyle and informational imagery.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Images retain correct proportion and share a deliberate visual treatment.

Image Integration · control and judgement

CONTROL MAP

Focal crop; horizon; subject placement; overlay; filter strength; resolution.

WATCH FOR

Stretching images, cutting key subjects or applying inconsistent filters.

QUALITY PROOF

Images retain correct proportion and share a deliberate visual treatment.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Lab 03 · Colour and Form Mood Board

Develop a natural, premium direction for the Two Trees olive-oil range.

Build a controlled mood board that communicates a brand personality through colour, shape and image treatment.

1. **Brief**
2. **Compose**
3. **Compare**
4. **Review**
5. **Evidence**

EVIDENCE — **One annotated mood-board JPEG and the five-colour palette.**

Full procedure · Learner Guide / Lab 03

Lab 04 · Product Advertisement Design

Create a premium advertisement for one Two Trees olive-oil variety.

Integrate product imagery, forms, typography and colour into a persuasive advertisement.

1. **Brief**
2. **Compose**
3. **Compare**
4. **Review**
5. **Evidence**

EVIDENCE — **Two design variants, comparison note and selected advertisement JPEG.**

Full procedure · Learner Guide / Lab 04

EXPLAIN THE DESIGN DECISION

Topic 2 Checkpoint

Purpose

What must the audience notice or understand?

Method

Why does this visual method fit the brief?

Control

Which setting most changes the result?

Failure

What defect would make it unacceptable?

Proof

Which view, comparison and export demonstrate quality?

Next

What controlled variation would improve it?

03

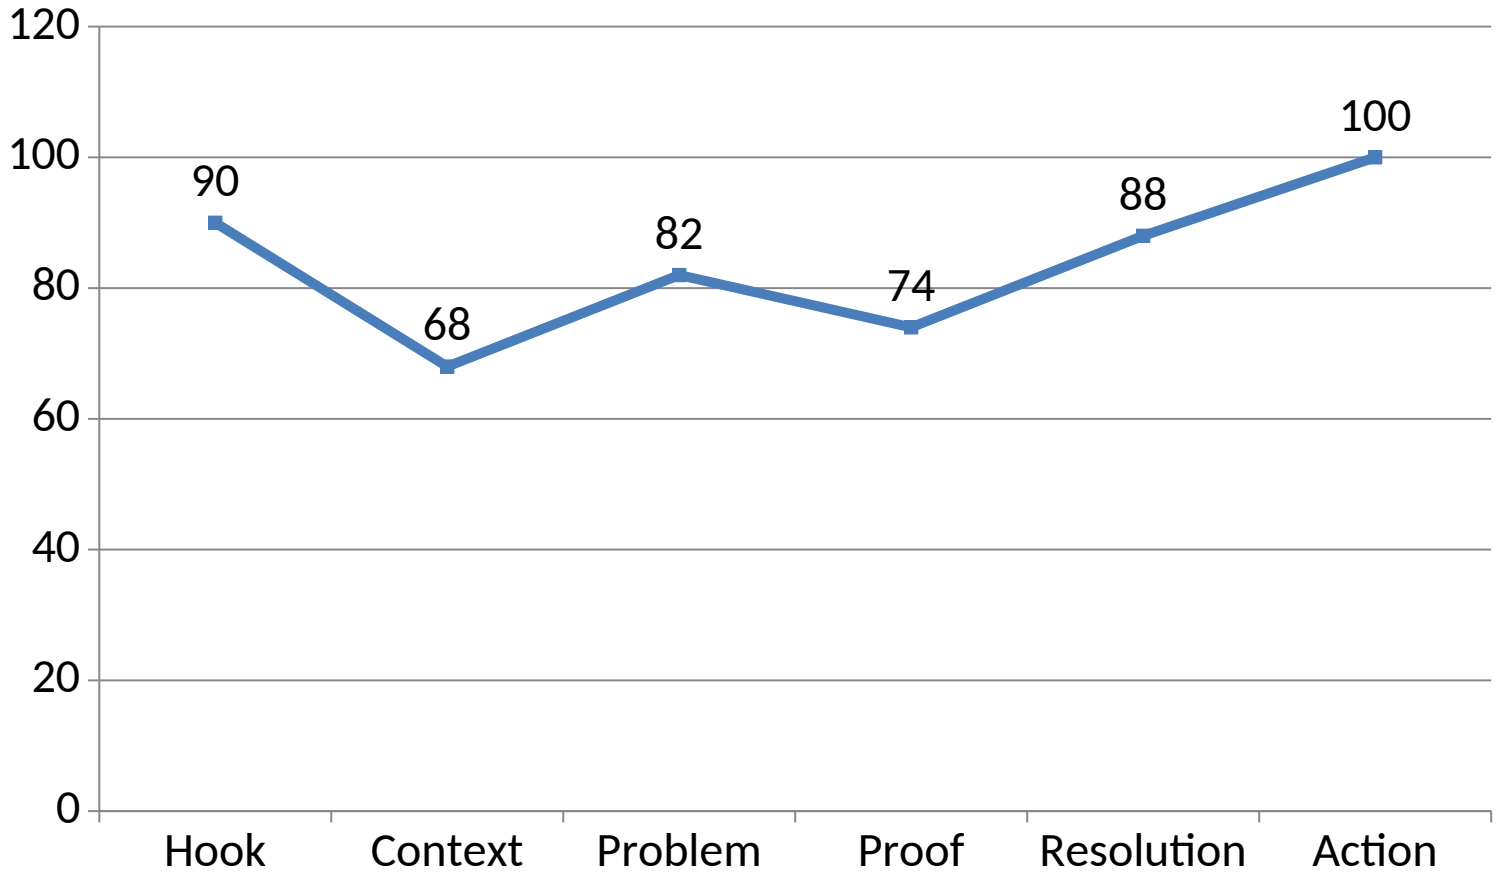

Storyboarding and Flow Design in Canva

Narrative beats · sequence · task flow · annotation · transitions · shared intent

LO2

EDITABLE SEQUENCE CHART

Storyboard Attention Across Six Frames

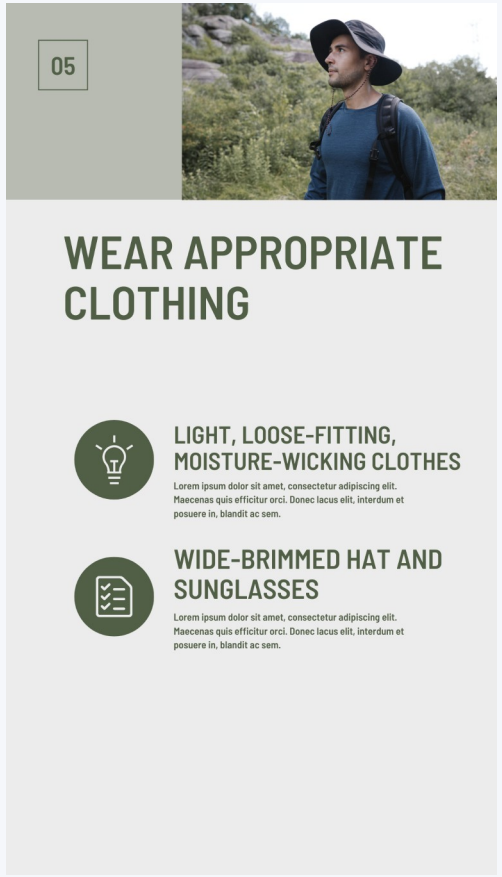

READ THE CHART

A planned sequence changes intensity while keeping the final action unmistakable.

Editable native PowerPoint chart

Storyboard Structure

1

How it works

Frames represent planned moments and make narrative sequence reviewable.

2

Best used for

Video, animation, presentation and social-story planning.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Each frame advances the message and identifies its production requirement.

Storyboard Structure · control and judgement

CONTROL MAP

Frame number; objective; visual; copy; audio; duration; transition.

WATCH FOR

Treating a storyboard as polished artwork instead of a decision tool.

QUALITY PROOF

Each frame advances the message and identifies its production requirement.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Narrative Arc

1

How it works

A beginning establishes context, a middle develops tension or evidence, and an end resolves with a response.

2

Best used for

Short promotional and educational sequences.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

A reviewer can summarise the sequence in one sentence.

Narrative Arc · control and judgement

CONTROL MAP

Hook; problem; proof; benefit; resolution; call-to-action.

WATCH FOR

Too much setup and no clear payoff or next action.

QUALITY PROOF

A reviewer can summarise the sequence in one sentence.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Task Flow

1

How it works

Nodes and connectors model actions, decisions, exceptions and completion.

2

Best used for

Service journeys, workflows, instructions and interaction planning.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Every decision has labelled outcomes and every path reaches a valid end.

Task Flow · control and judgement

CONTROL MAP

Start/end; action; decision; branch label; exception; owner.

WATCH FOR

Crossing connectors, ambiguous branches and missing end states.

QUALITY PROOF

Every decision has labelled outcomes and every path reaches a valid end.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Frame Composition and Transition

1

How it works

Shot scale, viewpoint and continuity determine how attention moves between frames.

2

Best used for

Turning a message outline into a coherent visual sequence.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The sequence varies emphasis while preserving continuity.

KEY CONTROLS · FAILURE MODE · PROOF

Frame Composition and Transition · control and judgement

CONTROL MAP

Wide/medium/close; camera angle; screen direction; cut; dissolve; match.

WATCH FOR

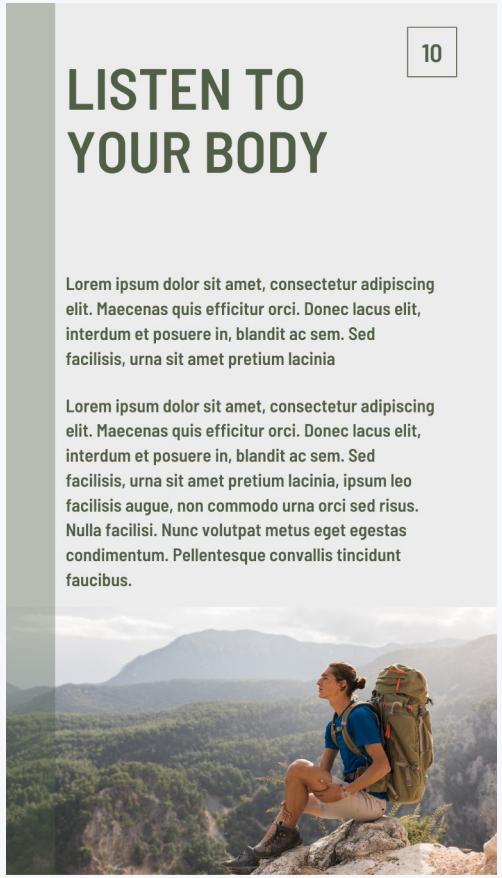

Repeating identical framing or using transitions as decoration.

QUALITY PROOF

The sequence varies emphasis while preserving continuity.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Storyboard Handoff

1

How it works

Annotations convert visual intent into shared production instructions.

2

Best used for

Collaborative projects where another person will animate, edit or approve.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Every frame has enough information for the next contributor to act.

Storyboard Handoff · control and judgement

CONTROL MAP

Timing; motion; audio; asset owner; status; comment; acceptance criterion.

WATCH FOR

Unlabelled placeholders and feedback without ownership.

QUALITY PROOF

Every frame has enough information for the next contributor to act.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Lab 05 · Storyboard Sequence

Plan a six-frame heat-exhaustion awareness video from risk recognition to action.

Create an annotated storyboard that communicates a short visual narrative to collaborators.

1. **Brief**
2. **Compose**
3. **Compare**
4. **Review**
5. **Evidence**

EVIDENCE — **Six-frame annotated storyboard JPEG plus sequence-test note.**

Full procedure · Learner Guide / Lab 05

Lab 06 · Task Flow Design

Map how a marketing team requests, reviews, revises and approves a social graphic.

Model a visual-production workflow with clear actions, decisions and end states.

1. **Brief**
2. **Compose**
3. **Compare**
4. **Review**
5. **Evidence**

EVIDENCE — **One labelled task-flow JPEG with a verified revision loop.**

Full procedure · Learner Guide / Lab 06

EXPLAIN THE DESIGN DECISION

Topic 3 Checkpoint

Purpose

What must the audience notice or understand?

Method

Why does this visual method fit the brief?

Control

Which setting most changes the result?

Failure

What defect would make it unacceptable?

Proof

Which view, comparison and export demonstrate quality?

Next

What controlled variation would improve it?

04

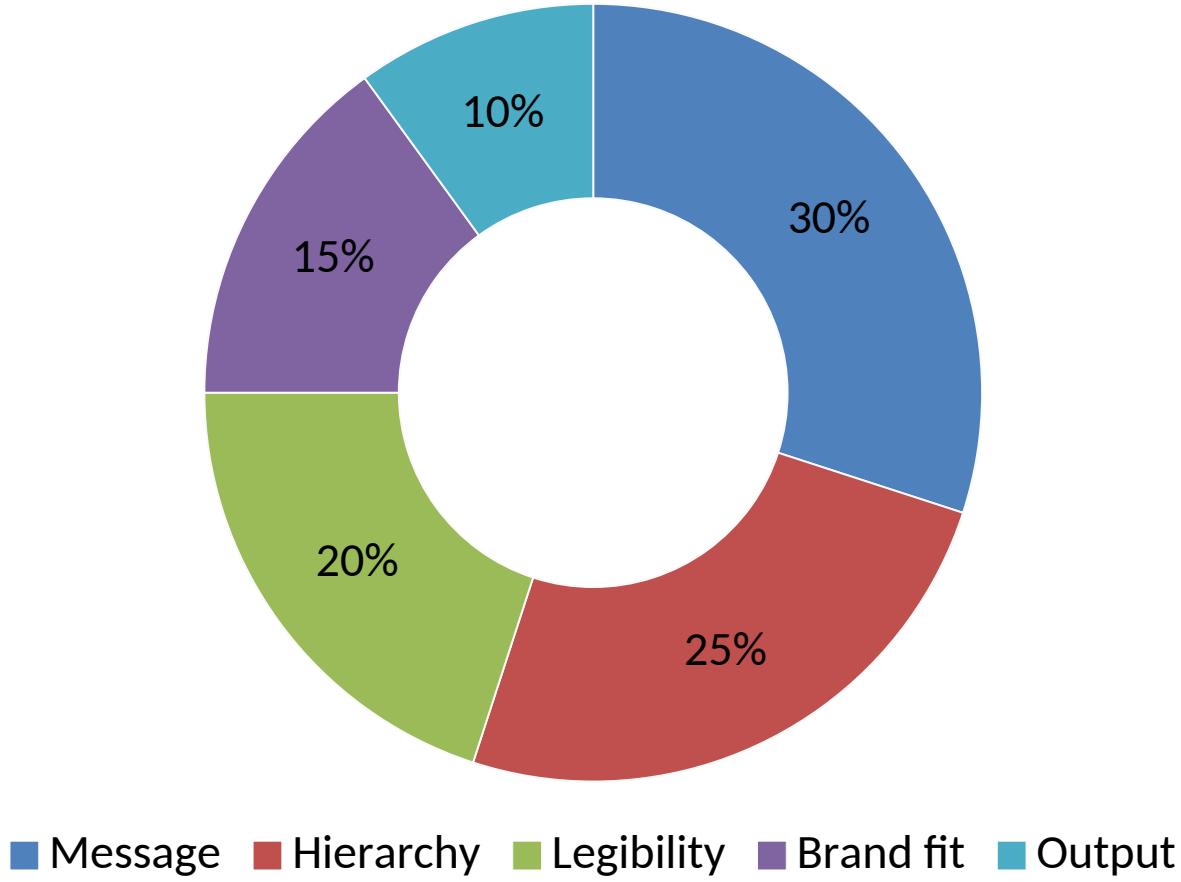

Best Practices and Aesthetic Analysis in Canva

Design principles · usability · rubric-based review · diagnosis · evidence-led recommendations

LO2

EDITABLE QUALITY CHART

Visual Review Weighting

READ THE CHART

Aesthetics alone are insufficient: message, readability and channel fitness carry most review weight.

Editable native PowerPoint chart

Design Principles Rubric

1

How it works

A shared rubric turns visual preference into reviewable criteria.

2

Best used for

Peer review, stakeholder sign-off and self-review.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Ratings cite visible evidence and identify the highest-priority gap.

Design Principles Rubric · control and judgement

CONTROL MAP

Hierarchy; balance; contrast; alignment; proximity; repetition; whitespace.

WATCH FOR

Scoring without examples or audience context.

QUALITY PROOF

Ratings cite visible evidence and identify the highest-priority gap.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Aesthetic and Functional Fit

1

How it works

A design must create the intended tone and still work in its channel.

2

Best used for

Campaigns where visual appeal, clarity and action all matter.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The review separates aesthetic appeal from functional performance.

Aesthetic and Functional Fit · control and judgement

CONTROL MAP

Brand fit; readability; navigation; format; loading; output quality.

WATCH FOR

Approving a beautiful design that fails the communication task.

QUALITY PROOF

The review separates aesthetic appeal from functional performance.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Focal Point and Eye Path

1

How it works

Contrast and spatial structure determine where the eye enters and travels.

2

Best used for

Posters, menus, slides and advertisements.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The intended eye path is confirmed by a short observation test.

Focal Point and Eye Path · control and judgement

CONTROL MAP

Largest contrast; face/subject gaze; directional lines; whitespace; grouping.

WATCH FOR

Multiple competing focal points and a hidden call-to-action.

QUALITY PROOF

The intended eye path is confirmed by a short observation test.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Evidence-Led Recommendation

1

How it works

A useful critique links feature, audience effect and specific revision.

2

Best used for

Turning evaluation into actionable design changes.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

A collaborator can implement the recommendation without guessing.

Evidence-Led Recommendation · control and judgement

CONTROL MAP

Observation; interpretation; brief criterion; recommended change; expected effect.

WATCH FOR

Vague comments such as make it pop or I do not like it.

QUALITY PROOF

A collaborator can implement the recommendation without guessing.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Accessibility Review

1

How it works

Inclusive design removes barriers created by weak contrast, small type, dense layouts or colour-only cues.

2

Best used for

Public-facing and workplace communication across devices.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Critical information remains perceivable and understandable in the target context.

Accessibility Review · control and judgement

CONTROL MAP

Contrast; minimum type size; reading order; plain language; alternatives.

WATCH FOR

Testing only on the designer's large monitor.

QUALITY PROOF

Critical information remains perceivable and understandable in the target context.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Lab 07 · Aesthetic and Functional Audit

Review the Two Trees product advertisement as if preparing it for stakeholder approval.

Evaluate a design with a shared rubric and propose specific enhancements.

1. **Brief**
2. **Compose**
3. **Compare**
4. **Review**
5. **Evidence**

EVIDENCE — **Completed rubric and side-by-side baseline/revised JPEG.**

Full procedure · Learner Guide / Lab 07

EXPLAIN THE DESIGN DECISION

Topic 4 Checkpoint

Purpose

What must the audience notice or understand?

Method

Why does this visual method fit the brief?

Control

Which setting most changes the result?

Failure

What defect would make it unacceptable?

Proof

Which view, comparison and export demonstrate quality?

Next

What controlled variation would improve it?

05

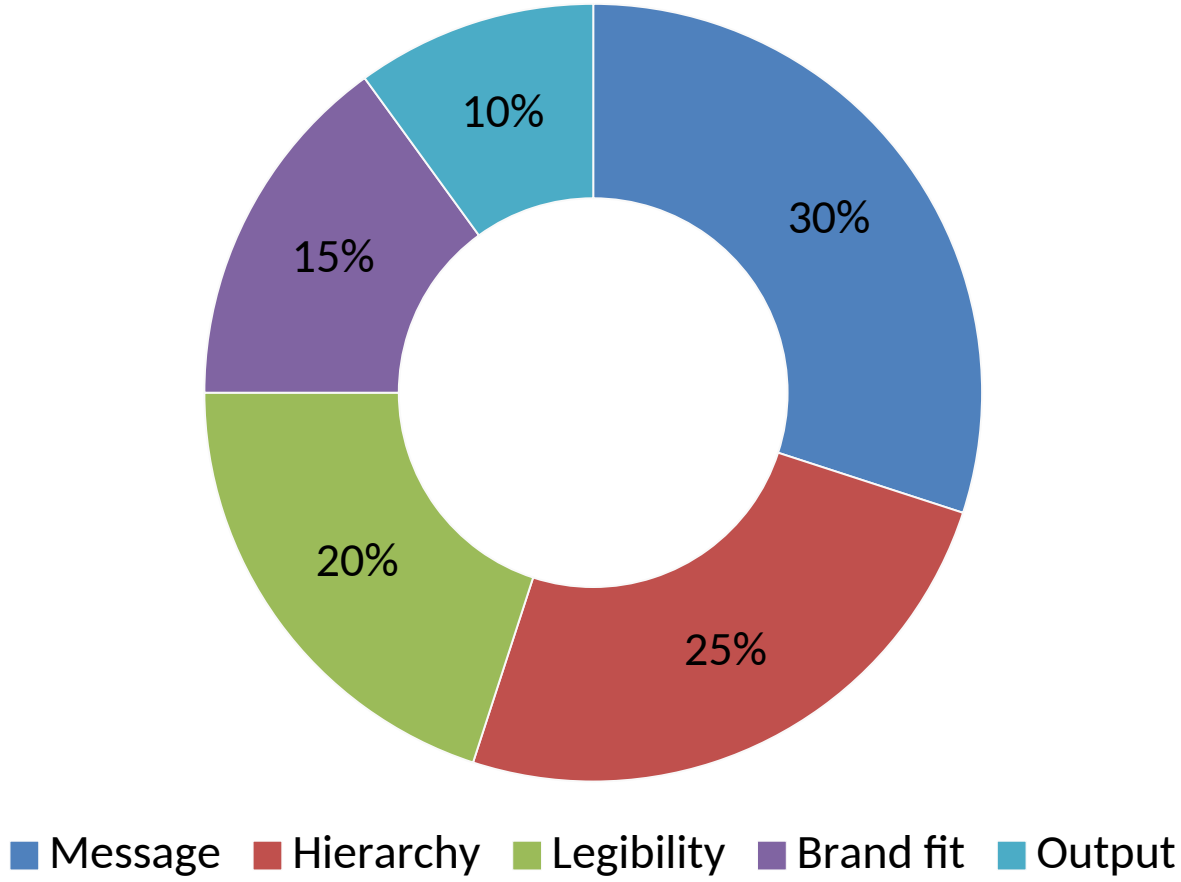

Critical Review and Enhancement Strategies

Critique protocol · collaboration · version comparison · prioritisation · iteration

LO3

EDITABLE QUALITY CHART

Visual Review Weighting

READ THE CHART

Aesthetics alone are insufficient: message, readability and channel fitness carry most review weight.

Editable native PowerPoint chart

Critique Protocol

1

How it works

Describe, ask, interpret, recommend and decide creates a respectful evidence-led conversation.

2

Best used for

Peer review sessions and stakeholder presentations.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The review record separates observations, decisions and actions.

Critique Protocol · control and judgement

CONTROL MAP

Brief restatement; design rationale; reviewer question; note; decision.

WATCH FOR

Defending every choice or critiquing personal taste.

QUALITY PROOF

The review record separates observations, decisions and actions.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Specific Feedback

1

How it works

Narrow feedback identifies what is working, what is not and why.

2

Best used for

Reducing revision cycles and conflicting stakeholder comments.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Each comment names a location and a communication consequence.

Specific Feedback · control and judgement

CONTROL MAP

Element; location; criterion; audience effect; severity; suggested direction.

WATCH FOR

Combining many unrelated issues in one vague comment.

QUALITY PROOF

Each comment names a location and a communication consequence.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Baseline and Version Comparison

1

How it works

Controlled before/after comparison reveals whether a change improved the intended criterion.

2

Best used for

Iterative enhancement and approval evidence.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The reviewer can identify the change and explain its measured or observed effect.

Baseline and Version Comparison · control and judgement

CONTROL MAP

Version name; changed variable; same viewing condition; outcome note.

WATCH FOR

Overwriting the baseline or changing many factors simultaneously.

QUALITY PROOF

The reviewer can identify the change and explain its measured or observed effect.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Revision Priority

1

How it works

Impact and effort help sequence corrections before refinements.

2

Best used for

Time-boxed projects with multiple review findings.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

High-impact issues are resolved before low-risk enhancements.

Revision Priority · control and judgement

CONTROL MAP

Message failure; accessibility; technical defect; brand inconsistency; polish.

WATCH FOR

Spending time on cosmetic details while critical text remains unreadable.

QUALITY PROOF

High-impact issues are resolved before low-risk enhancements.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Iterative Improvement Loop

1

How it works

Observe, interpret, decide, revise and verify links feedback to evidence.

2

Best used for

Continuous improvement of a design system or campaign.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The final version closes every accepted review action.

Iterative Improvement Loop · control and judgement

CONTROL MAP

Criterion; change; owner; due date; version; verification result.

WATCH FOR

Making a change without verifying the exported output.

QUALITY PROOF

The final version closes every accepted review action.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Lab 08 · Peer Review and Iteration

Review a Lakehouse menu or social tile and close accepted feedback actions.

Use structured comments and version comparison to improve a design collaboratively.

1	2	3	4	5
Brief	Compose	Compare	Review	Evidence

EVIDENCE — **Baseline, revised version, comment decision log and before/after JPEG.**

Full procedure · Learner Guide / Lab 08

EXPLAIN THE DESIGN DECISION

Topic 5 Checkpoint

Purpose

What must the audience notice or understand?

Method

Why does this visual method fit the brief?

Control

Which setting most changes the result?

Failure

What defect would make it unacceptable?

Proof

Which view, comparison and export demonstrate quality?

Next

What controlled variation would improve it?

06

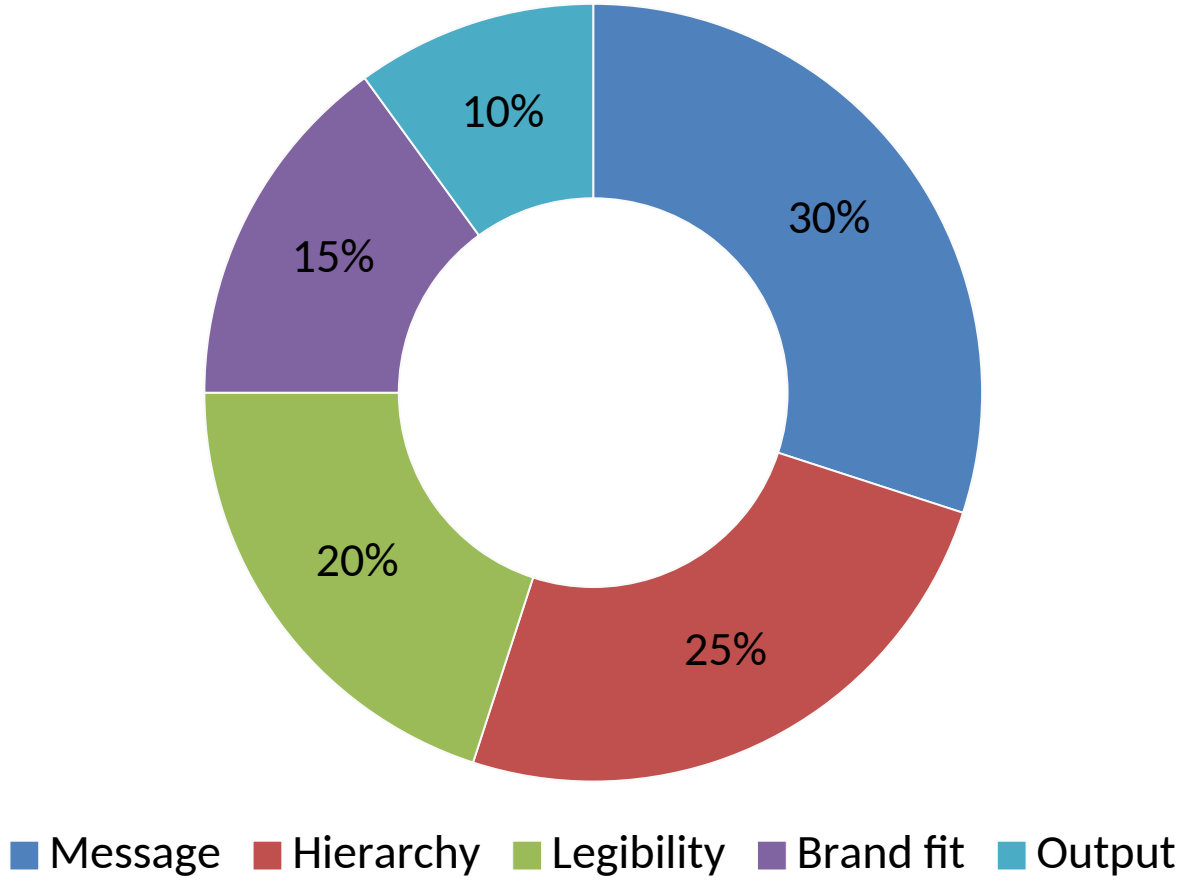

Innovative Approaches to Design in Canva

Brand systems · reusable templates · collaboration · multi-format adaptation · responsible AI

LO3

EDITABLE QUALITY CHART

Visual Review Weighting

READ THE CHART

Aesthetics alone are insufficient: message, readability and channel fitness carry most review weight.

Editable native PowerPoint chart

Brand System

1

How it works

Colour, typography, imagery, layout and voice rules coordinate many outputs.

2

Best used for

Teams producing campaigns at speed without losing recognition.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Different outputs remain recognisably related while fitting their channels.

Brand System · control and judgement

CONTROL MAP

Logo usage; palette; type roles; image treatment; grid; examples.

WATCH FOR

A brand kit that lists assets but not how to use them.

QUALITY PROOF

Different outputs remain recognisably related while fitting their channels.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Multi-Format Adaptation

1

How it works

Each format needs a recomposed hierarchy for its dimensions, context and interaction.

2

Best used for

Social posts, stories, presentations, posters and banners.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

Every format preserves the primary message and passes its own visual check.

Multi-Format Adaptation · control and judgement

CONTROL MAP

Aspect ratio; safe area; focal crop; copy length; call-to-action; export.

WATCH FOR

One-click resizing without checking hierarchy or cropping.

QUALITY PROOF

Every format preserves the primary message and passes its own visual check.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Reusable Template Governance

1

How it works

Templates protect repeated structure while defining safe areas for change.

2

Best used for

Distributed teams and recurring communication.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

A new contributor can create an approved variant without redesigning the system.

Reusable Template Governance · control and judgement

CONTROL MAP

Locked elements; editable zones; page naming; examples; owner; version.

WATCH FOR

Templates so rigid they cannot fit real content or so open they lose consistency.

QUALITY PROOF

A new contributor can create an approved variant without redesigning the system.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Collaborative Workflow

1

How it works

Roles, comments, approvals and version conventions coordinate distributed design work.

2

Best used for

Team ideation, review and handoff in Canva.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The design history shows who requested, changed and approved each revision.

Collaborative Workflow · control and judgement

CONTROL MAP

Owner; editor; commenter; due date; status; approval; naming.

WATCH FOR

Unresolved comments, duplicate versions and unclear final authority.

QUALITY PROOF

The design history shows who requested, changed and approved each revision.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Responsible AI-Assisted Visuals

1

How it works

AI can accelerate ideation and production, but humans retain responsibility for the published result.

2

Best used for

Concept exploration, draft copy, image generation and controlled variations.

3

Professional decision

Choose this method when its content model and edge behaviour fit the brief.

4

Quality signal

The selected output has a documented prompt, human review and usage decision.

Responsible AI-Assisted Visuals · control and judgement

CONTROL MAP

Prompt; source rights; factual check; artefact review; bias; provenance; approval.

WATCH FOR

Publishing plausible-looking outputs without checking accuracy or permissions.

QUALITY PROOF

The selected output has a documented prompt, human review and usage decision.

Decision rule · preserve a baseline, isolate the intended change, then inspect at the delivery size.

Lab 09 · Multi-Format Campaign Adaptation

Adapt a Lakehouse campaign into square post, vertical story and presentation slide formats.

Recompose one message across formats while preserving brand recognition and hierarchy.

1. **Brief**
2. **Compose**
3. **Compare**
4. **Review**
5. **Evidence**

EVIDENCE — **Three format JPEGs plus a comparison board.**

Full procedure · Learner Guide / Lab 09

Lab 10 · Collaborative Brand Campaign Capstone

Produce a launch mini-campaign for the Two Trees olive-oil range and prepare it for team handoff.

Integrate brief, mood board, advertisement, storyboard, critique and enhancement strategy into one coherent campaign.

1. **Brief**
2. **Compose**
3. **Compare**
4. **Review**
5. **Evidence**

EVIDENCE — **Campaign brief, mood board, brand rules, two campaign visuals, storyboard, critique record, revised output, enhancement strategy and final JPEG package.**

Full procedure · Learner Guide / Lab 10

EXPLAIN THE DESIGN DECISION

Topic 6 Checkpoint

Purpose

What must the audience notice or understand?

Method

Why does this visual method fit the brief?

Control

Which setting most changes the result?

Failure

What defect would make it unacceptable?

Proof

Which view, comparison and export demonstrate quality?

Next

What controlled variation would improve it?

COURSE SYNTHESIS

Professional Visual-Communication Workflow

Brief

Clarify purpose, audience, channel and constraints.

Source

Choose suitable, rights-cleared assets.

Construct

Use visible hierarchy and a repeatable layout system.

Experiment

Vary one factor against a baseline.

Evaluate

Inspect visual, technical and rights criteria.

Deliver

Export, reopen and retain the named baseline and final version.

RESPONSIBLE ASSET USE

Copyright and Asset Permission

Ownership

Identify the creator or owner.

Permission

Public visibility does not grant reuse.

Scope

Check modification, commercial and redistribution rights.

People

Confirm consent and privacy context.

Attribution

Credit as the licence requires.

Record

Retain source, licence, consent, date and use.

Peer Review

Describe

State purpose and key decisions.

Show

Reveal baselines, alternatives and comments.

Ask

Use explicit evaluation criteria.

Record

Capture what the reviewer noticed.

Decide

Accept, adapt or reject with a reason.

Revise

Make one traceable improvement.

HELP IMPROVE DELIVERY

Course Feedback

Complete

Use the course feedback form shared by your trainer.

Be specific

Name the explanation or resource that helped or blocked you.

Rate fairly

Separate content, facilitation, venue and administration.

Suggest

Describe one practical improvement.

Support

Post-course subject consultation is available.

CONTINUE THE CREATIVE WORKFLOW

Recommended Courses

Photoshop

Edit and composite raster imagery.

InDesign

Build print and digital publications.

After Effects

Animate graphic systems.

Premiere Pro

Edit campaign video.

UI Design

Apply hierarchy to digital interfaces.

Portfolio

Document process and verified outputs.
